

AUTOMATIC TOOL CHANGER

**TAIWAN 2022
EXCELLENCE**

MCTC series

Features

Flexible Application

A single R-plate can correspond to multiple T-plate (e.g., grippers, pneumatic tools, vacuum pad...)

Patents & Awards

Taiwan Utility Patent
2022 Taiwan Excellence
Award

Safety Self-Locking

Equipped with a pneumatic source cut-off protection mechanism to ensure the R-plate and T-plate remain securely connected

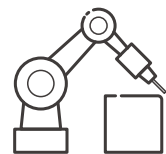

Electric Feed-through Module

Accurate connection change with electric module to avoid manual operation mistakes

High Performance

High rigidity & precise positioning
High repeatability ± 0.015 mm

ISO Adapter Board

Easily mountable on most types of robotic arms
